

Brainstorming & Idea Prioritization

Date	06 July 2026
Team ID	
Project Name	Ledgerline – Credit Card Approval Prediction System
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Siri	Train multiple ML models and compare them before picking one	Automation	1
2	Manasa	Let analysts enter one applicant at a time via a web form	Usability	2
3	Jahnavi	Let compliance officers upload a CSV to screen many applicants at once	Usability	2
4	Rupa	Turn the messy multi-class payment status codes into one clear risk label	Risk & Compliance	3
5	Sudha	Show a confidence score, not just a yes/no answer	Transparency	4
6	Siri	Make the model deployable on IBM Watson for cloud access	Deployment	5

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Train & compare Logistic Regression, Decision Tree, Random Forest, and XGBoost	High	High	1	Yes
2	Build single-applicant and batch CSV screening into one Flask app	High	High	2	Yes

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
3	Convert payment-history STATUS codes into a binary risk label	High	High	3	Yes
4	Show confidence score + key factors alongside the decision	Medium	High	4	Yes
5	Deploy to IBM Watson Machine Learning	Medium	Medium	5	Yes
