Customer Problem Statement

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a bank credit analyst reviewing applications	approve or reject credit card applications quickly and consistently	I must manually check income, employment history, and credit records for every applicant	there is no automated, consistent way to apply the same rules across thousands of daily applications	overwhelmed and worried about making inconsistent or biased decisions
PS-2	a prospective credit card applicant	find out if I'm likely to be approved before submitting a formal application	I only learn the outcome after submitting, with no explanation of why	the decision is made through an opaque manual review with no instant feedback mechanism	anxious and frustrated, especially when rejected without any reasoning
